

Greetings from Cyprus!

Would you mind share your experience of interaction with SYSTEM TECHNOLOGIES? Sure, if that works better for you – we can setup a video call and discuss this in more details (if needed), otherwise my answers below in-line.

What about customer focus, flexibility?

SYSTEM TECHNOLOGIES team clearly has experience in supporting multi-office enterprises like FxPro. They have spot on tracking and collaboration tools to maximise efficiency of multi-teams/multi-offices. Internally we have 20+ people on a project with them directly, and over 100 people indirectly (+SYSTEM TECHNOLOGIES team of 30+ people), and so far, SYSTEM TECHNOLOGIES managed to deliver things efficiently and effectively.

How quickly your issues and problems were resolved?

Very. When we have been hitting deadlines, SYSTEM TECHNOLOGIES was working overtime and on weekends, which allowed us to release our product on time.

Have you faced the problems of lack of resources or expertise from SYSTEM TECHNOLOGIES side?

Not that I can think of.

Has your project been completed on time?

Yes. On a contrary, we have not been able to work at pace of SYSTEM TECHNOLOGIES, so they have been indirectly pushing us (which is extremely good for internal productivity).

Ilya Holeu
CMO
FxPro Group
